

OFF-SITE TAPE VAULTING

Data Protection for Ensured Recovery

- 40% of companies that fail to recover data from a disaster within three days eventually go out of business.
- An increasing number of risks threaten critical business data.
- Corporate information lifecycle controls and accountability are now a mandate.

ENSURING BUSINESS CONTINUITY

Thousands of organizations trust Iron Mountain to protect their backed up computer data off-site, and have for more than 55 years. Iron Mountain's Off-Site Tape Vaulting solutions lay the foundation for business continuity, with the most reliable data protection and recovery available.

SAFEGUARDING CRITICAL BUSINESS DATA

Iron Mountain's Off-Site Tape Vaulting service delivers unmatched data protection and recovery. We store your critical backup data securely — off-site, offline and out-of-reach — as a result, a copy of your data is always shielded from natural disasters, utility outages, viruses and worms, internal technology failures, and human errors and sabotage. Iron Mountain gives you the assurance that your data is available for recovery whenever and wherever you need it.

With over 15,000 trained employees, you benefit from the comfort of assured availability and accessibility to your data in case of disaster. And behind these resources are proven best practices around security, chain of custody, transport and delivery ensuring service reliability — all designed to reduce risk to your data which allows you to focus on other critical business objectives.

BE PREPARED FOR UNSCHEDULED DOWNTIME AND DISASTER

With Iron Mountain Off-Site Tape Vaulting, you control your data, with the power to recover what you need to resume business. Your data is continuously accessible for monitoring and management through an easy-to-use Web interface and available for recovery whenever and wherever you need it.

Iron Mountain's depth and breadth of resources accelerate recovery both locally and globally, allowing you to quickly continue on with business. Customer support is always a phone call away. And Iron Mountain's fleet of secure vehicles and specially chartered ground and air transport can rapidly deliver your data to any location you stipulate. Most important, Iron Mountain Off-Site Tape Vaulting services are proven — in more than 250 successful disaster recoveries and more than 25,000 disaster recovery tests.

"Companies must have a secure and reliable plan for safeguarding their critical data from both natural disasters and human threats. Iron Mountain has over 30 years of experience in the data protection business, delivering a comprehensive suite of media vaulting services, data backup and rapid recovery services."

*– John McCarthy, Group Vice President,
Worldwide Storage Research, IDC*

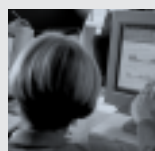

KNOW WHERE ALL YOUR BACKUP MEDIA IS AND PROVE IT

Iron Mountain is uniquely capable of providing full accountability for your data — and helping you achieve complete protection and demonstrate accountability to corporate stakeholders and government auditors.

Iron Mountain's internal vault management system continuously monitors the location of your media during transport and storage. Using Iron Mountain's SecureSync™ solution to access this system, your authorized personnel can easily audit your media inventory any time, and generate up-to-date, accurate status reports — both current and historical — for any and all media in Iron Mountain's care. The system also proactively reports any rotational discrepancies, enabling immediate resolution.

With global consistency and locally implemented services, Iron Mountain's proven 55 year track record of responsiveness and reliability as the leader in comprehensive information protection and storage services, are designed to reduce cost, complexity and risk to your business while enhancing compliance and control.

THE INCREASING THREATS TO DATA

83% of the companies studied in Deloitte & Touche's 2004 *Global Security Survey* reported security breaches — with the greatest increase in the area of viruses and worms. This is more than double the number reported the year before.

A ONE-STOP RESOURCE

In addition, Iron Mountain offers comprehensive data protection services including:

- **Disaster Recovery Support Services.** Our highly trained professionals are always ready to assist with your data recovery. In the event of a disaster we can ensure recoverability by getting your data to wherever you need it, at the time you need it. We can also assist with testing your disaster recovery plan. We have participated in over 25,000 disaster recovery tests and are uniquely qualified to help you validate your plan.
- **Digital Data Protection.** Iron Mountain offers a full range of digital data protection services. Use LiveVault® and Connected® Backup/PC to protect data on remote servers and PC's and ensure a complete data protection strategy — from the data center to the edge of the network.
- **Library Moves.** When you need to move your tape library, Iron Mountain can inventory, pack, transport and set it up — with full data protection at each step and minimized downtime during the process
- **Data Products.** You can purchase high quality data products, including media and racks, directly from Iron Mountain — quickly and conveniently.
- **Consulting Services.** Iron Mountain professionals with knowledge of specialized industries such as healthcare, pharmaceuticals, financial services, and energy can help you address the evolving challenges of electronic and hard-copy records management and retention.

We also offer:

- **Records Management**
- **Digital Archiving**
- **Film and Sound Archiving Services**
- **Intellectual Property Management**
